

## TECHNICAL GUIDE

### MODELS: MX

#### MODULAR STANDARD ECM AIR HANDLERS FOR USE WITH SPLIT SYSTEM COOLING & HEAT PUMP

1200 - 2000 CFM BLOWERS

3 - 5 TON COILS

OPTIONAL 1 & 3 $\phi$  ELECTRIC HEATERS

Due to continuous product improvement, specifications are subject to change without notice.

Additional rating information can be found at:

[www.ahridirectory.org](http://www.ahridirectory.org)

## DESCRIPTION

This unique modular system allows the flexibility to handle any application. These versatile coils and blowers may be used for upflow, downflow, or horizontal left or right applications. They may be combined to function as a cooling only unit or with a heat pump including electric heat for 1 and 3 phase applications. The blower and electric heater could be used as stand alone electric furnaces.

## FEATURES

**Blowers** - Models to match any air flow or voltage requirement. The compact size allows easy installation. Blowers are sized to deliver design air quantity both efficiently and quietly. All models use a high efficiency brushless DC motor to provide cooling SEER rating enhancement. The durable, pre-painted steel protects the unit against rust and corrosion. All models have 1 inch foil face fiber glass insulation, providing a thermal insulation value of R-4.2.

**Coils** - Staggered rows of rifled copper tubes are mechanically expanded into enhanced surface aluminum fins to provide high heat transfer and long-lasting quality. The MC multi-position coils may be used for upflow, downflow, and horizontal left or right applications. Coil cabinets are insulated with 3/4" foil face insulation to prevent sweating.

**Thermal Expansion Valves** - Coils are ordered as "Flex-coil" units without a factory installed metering device or with R-410A factory installed TXV's. Flex-coil models allow for field installed R-22 or R-410A TXV's for added flexibility to meet refrigerant system choice.

**Electric Heaters** - Both single and three phase electric heater models are available to match any requirement. All heaters include nickel-chromium elements with a 5-year limited warranty on single phase heating elements and 1 year limited warranty on 3 phase heating elements. Sequential operation is provided to control heaters in all models. Circuit breakers are used in 208/230 volt, single-phase heaters of 15 KW and larger. Models equipped with circuit breakers may be altered in the field to use multi-source power supply. Over-temperature limit switches provide protection from airflow loss with fusible link backup protection.

**Accessories** - A full line of matching accessories available for use with the blower and coils to allow any type application.

## LIMITATIONS

These units must be wired and installed in accordance with all national and local safety codes.

Voltage limits are as follows:

AIR HANDLER VOLTAGE	NORMAL OPERATING VOLTAGE RANGE*
208/230-1-60	187 - 253

\* Rated in accordance with ARI Standard 110, utilization range "A".

Air flow must be within the minimum and maximum limits approved for electric heat, evaporator coils and outdoor units.

**DIMENSIONS**

**POWER WIRING**

**ACCESSORIES**

Refer to Price Manual for specific model numbers.

**Electric Heaters** - Models shown under Electrical Data include sequencers and temperature limit switches and fusible links for safe, efficient operation. Circuit breakers are provided where shown.

**Suspension Kit** - Suspension Kit Model 1BH0601 is designed specifically for upflow application of the units contained in this technical guide. For suspension of these units in horizontal applications, it is recommended to use angle support brackets with threaded rods at locations shown in air handler installation instructions.

**Filter Rack** - External filter rack accessories 1FR08\* must be used when unit is installed for application outlined.

**Combustible Floor Base** - If an electric heat accessory which is rated for greater than zero clearance to combustible surfaces is installed in these air handlers in the downflow operating positions on a combustible floor, one of the following combustible floor base accessories is required: 1FB1817, 1FB1821, or 1FB1824.

**FILTER RACK ACCESSORY**

**DIMENSIONS**

Filter Rack Model Multi-Position	Used With	Rack Dimensions Inches				Filter Dimensions Inches		
		A	B	C	D	Width	Length	Thickness
1FR0817	MX12B	17-1/2	16-3/8	15-1/2	21	16	20	1
1FR0821	MX16C	21	19-7/8	19	21	20	20	1

1FB1824	MX12D, MX20D	26.9	25.0	21.9	23.9

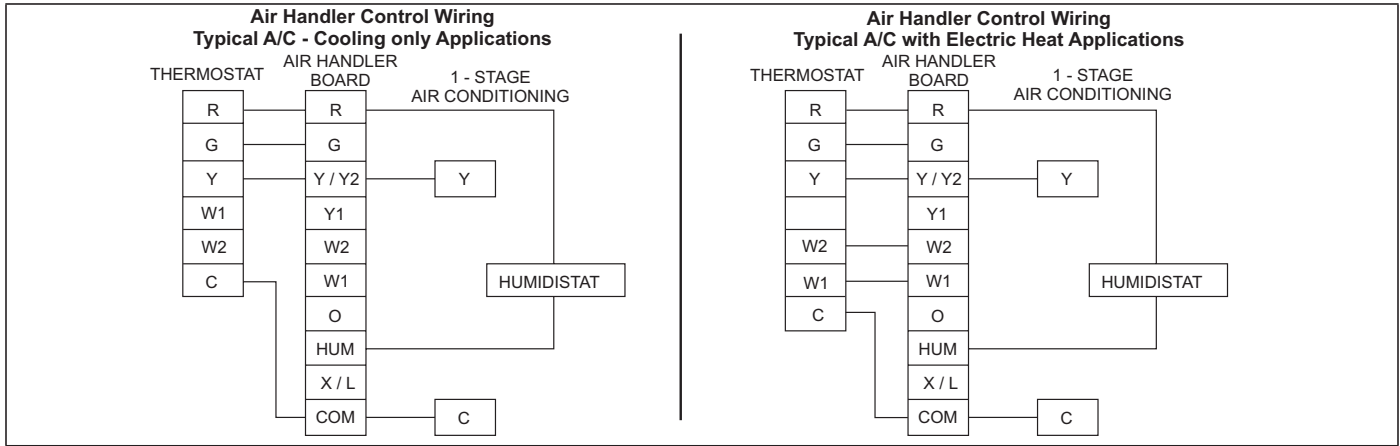

**APPLICATION FACTORS - Rated CFM vs. Actual CFM**

% OF RATED AIR FLOW	80%	90%	RATED CFM	110%	120%
CAPACITY FACTOR	0.96	0.98	1.00	1.02	1.03

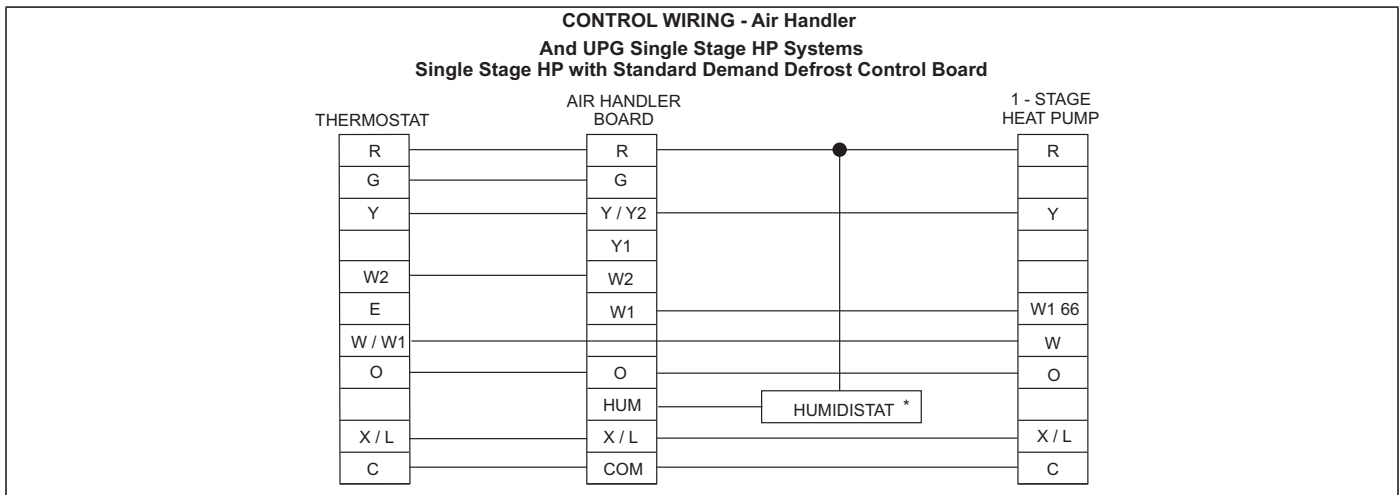

**TYPICAL APPLICATIONS WITH MC MULTI-POSITION COILS**

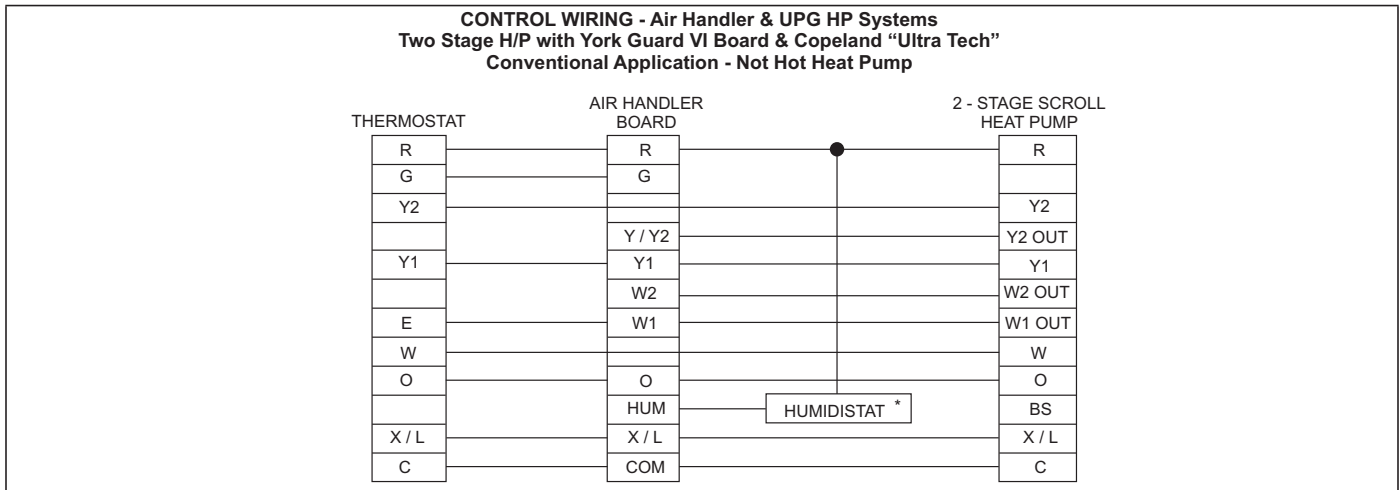

**CONVENTIONAL CONTROL WIRING (24 VAC)**

**FIGURE 2: COOLING MODELS WITH ELECTIC HEAT WIRING**

**FIGURE 3: SINGLE-STAGE HEAT PUMP WIRING**

**FIGURE 4: TWO-STAGE HEAT PUMP WIRING**

\* Optional dehumidification humidistat switch contacts open on rise.

**Notes:**

1. "Y/Y2" Terminal on air handler control board must be connected for full CFM and applications requiring 60 second blower off delay for SEER enhancement.
2. Remove humidistat jumper on air handler control board.
3. For heat pump applications - set MODE jumper on air handler control board to the HP position.
4. To change quantity of heat during HP defrost cycle - reverse connections at W1 and W2 on air handler control board.

NOTE: Air flow data shown above 1/2" w.c. external static pressure is for REFERENCE ONLY. Maximum allowable external static when electric heat is used is limited to 1/2" w.c. Maximum allowable external static pressure may also be limited by minimum CFM requirements for proper Heat Pump operation.

1. Dry coil conditions only, tested without filters.

† Speed temp High #1 not recommended for the unit.

Air handler units are UL Listed up to 0.5" w.c. external static pressure, including air filter, wet coil, and largest kW size heater, unless otherwise noted.

# NOTES
