You can depend on York® to give you the choices you trust for comfortable performance all day long, year after year. Want to know more? Contact your York® Distributor.
Intelligent control is the key to unlocking the full efficiency and reliability inside today’s York® HVAC equipment. That’s why the extensive engineering expertise and the world-class resources of Johnson Controls created Simplicity® Smart Equipment controls for York® packaged units and split system products.

Intelligent simplicity for today’s control needs.
With Simplicity® SE controls, accessing parameters for setup, startup and commissioning is easy thanks to user-friendly menus and navigation. It also simplifies access to operational and energy data, which is vital to maintaining system health, improving performance and protecting components through advanced troubleshooting—all of which increase operational savings.

Easier to use for greater reliability.
Using Simplicity® SE control is uncomplicated thanks to a standard two-line LCD display, navigation joystick and optional Wi-Fi® connectivity. Changing set-points, viewing temperatures and operational status can be done quickly to address issues before they become problems.

Three simple benefits:
• Use less energy through smarter control of fans, economizer dampers, compressors and other equipment functions
• Reduce legwork and guesswork with centralized control and monitoring
• Prevent unexpected service calls with improved monitoring and preventive maintenance

More control for more savings.
Simplicity® SE controls provide powerful energy-tracking and monitoring capabilities to ensure the entire HVAC system is performing at its peak—cutting energy costs by ensuring optimum performance.

More control for greater comfort.
More flexible control means greater comfort—which Simplicity® SE controls deliver through simultaneously optimizing temperature, humidity and indoor air quality using included return air, supply air and outdoor temperature sensors and optional CO₂ sensors.

Save time with convenient communication.

HVAC control just became a whole lot smarter—and easier!
No one competes with Simplicity® SE controls for combining fast, push-button programming with extensive capabilities to simplify startup, commissioning, troubleshooting and energy tracking. Capabilities include:

• Easy-to-navigate LCD screen with navigation joystick—and optional wireless Mobile Access Portal (MAP) for Wi-Fi® or hardwired networking for your smartphone, tablet or PC
• Two- or four-stage independent control on all multiple refrigeration circulated models with lead-lag capabilities
• Supports gas/electric, electric/electric and heat pump packaged and commercial split system configurations without the need for additional defrost, reheat or other controls
• Compatible with MODBUS® RTU, BACnet® MS/TP and N2 protocols with optional Novus, CPC, Honeywell or other field-installed controls

Simplicity® Smart Equipment controls—now standard on select commercial and split system products.

• Supply, return and outdoor temperature sensors come standard, with optional enthalpy and humidity sensors
• Alarm recall—even after power failure
• Adjustable minimum compressor run time
• Five-minute anti-short cycle delay
• Heat to cool and cool to heat delays of 300 to 120 seconds
• High- and low-pressure temperatures and limits for each circuit
• Control accepts smoke detector, CO₂ sensor, space temperature, dirty filter and air proving inputs

• Humidity control utilizing MagnaDRY™ hot gas reheat technology
• Low voltage protection
• Gas heating safety monitoring
• Multiple speed constant volume IntelliSPEED® option
• Variable air volume control option
• Dry bulb, single and dual enthalpy economizer options
• Power exhaust with purge option

Get smart with Wi-Fi® access.
The optional wireless Mobile Access Portal (MAP) device allows several users to access one or more units using a Web browser over a Wi-Fi® or hardwired connection. It’s simple to access operational data, set-points, schedules and diagnostic data directly from a smartphone, tablet, laptop or an on-site personal computer—no expensive software or cumbersome app download needed. Of course, that’s what you expect from Simplicity® SE controls—now standard on select commercial and split system products.
